

Surgery Consent

Here at *ALL ABOUT PETS* we want to provide you the best possible care for your pet available. All pets will receive a comprehensive exam prior to surgery, and for most procedures pain medications. We also want to make sure that your pet is current on vaccinations. We do offer optional intravenous fluids. IV fluids main purpose is to maintain blood pressure during the surgical procedure. Having an IV in place during the procedure also ensures that in the rare case of anesthetic complications, that we have immediate access to the vein to give life saving-medications. An IV can be placed for an additional \$26.25.

Would you like an IV placed in your pet for the surgery today?

_____YES

_____NO

No surgery is routine. With any surgery there is always a risk of complications. Complications can include infection, failure of the repairs, even death. If you have any questions, please ask us prior to surgery.

I have read and understand the surgery consent form. By signing below, I understand that complications can occur, and I consent to *All About Pets* to perform surgery.
